Our range include indoor, outdoor, illuminated or non-illuminated systems.

Our products are made of quality environmental friendly materials like: aluminum, acrylic, polycarbonate, and ABS.

We offer all fixing options, door, wall, free occupied, name plates, directories, suspending, projecting, desk stands, monolith (free standing), and paper flex for frequent changing. Our systems can be used in almost every sector, like health care, corporations, education, hospitality, governments, and retail.

Wide range of materials, and techniques of production.
Use the available resources, starting with a simple printer, to any sophisticated production equipment.
All will produce an elegant sign with our system.

Compatible with most types of Braille and tactile text.

We offer wide range of standard sizes, custom sizes are also available.

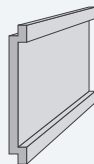

Simple to use, assemble, install, change, and modify.

Sold only to Sign Professionals.

Our economical, practical and easy to use insert channel that comes in many standard and custom sizes.

Aluminum profile,

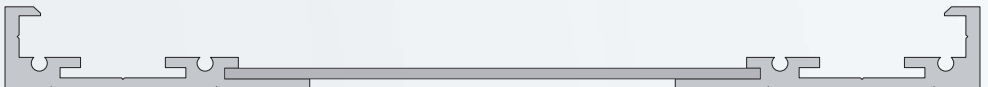

One acrylic sheet
Back side sticker

Aluminum profile,

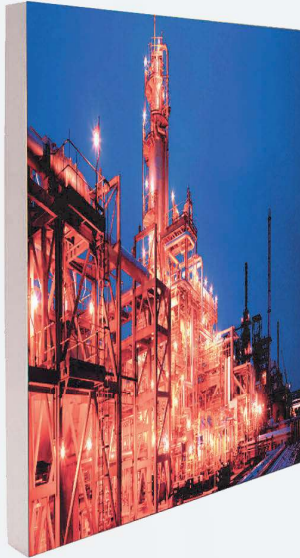

Two acrylic sheets
And paper in between,

Eco SERIES
Sign System

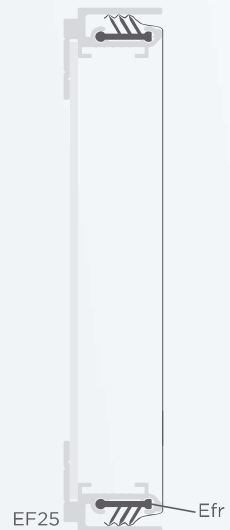

We developed the new 27mm slim aluminum profile that works together with the plastic strip. Both hold the fabric firmly, no need for silicon strip or sewing.

The profile can be combined with Eco Light System, to make an illuminated single or double sided sign.

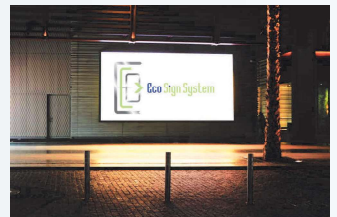

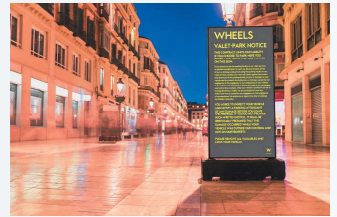

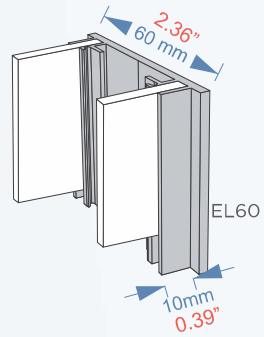

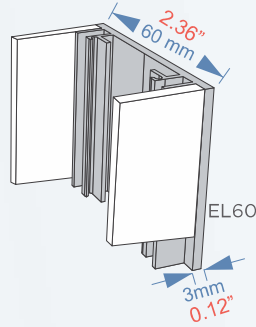

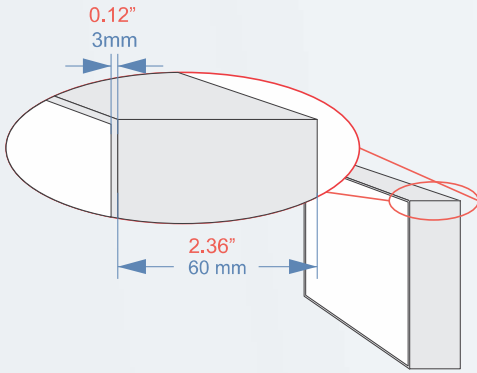

Eco series
Sign System

Slim rigid profile almost 3mm (0.12") frame or 10mm (0.39") frame inner channel
 Accepts variety of rigid materials like plastics, composites aluminum and others...
 Can be used as one side wall mounted light box or double sided projected or suspended sign.
